

Pactera is looking for Internet Judges - creative thinkers who enjoy searching the internet and are willing to share their opinion on the quality and content of the web.

The Internet is probably the most powerful tool we have to look for information. However, search results are sometimes neither up-to-date nor relevant. Would you like to be part of the effort to improve one of the largest search engines in the world? Then, jump onboard and be a game changer! Make the Internet more relevant and effective, more exciting and fun!

The tasks will involve researching top local sites to find particular items (for example, restaurants) and gather specific information to fill in predefined templates, as well as deciding between two or more query results, reviewing and editing deep links, among other interesting tasks.

The tasks will involve researching top local sites to find particular segments (for example, restaurants) and gather specific information to fill in predefined templates, as well as deciding between two or more query results, reviewing and editing deep links, among other interesting tasks.
